Brace wear monitoring gives us all valuable information regarding the patient’s ability to wear the brace for the recommended hours. When we see success, we celebrate, when we see difficulty, we can have an honest conversation and develop strategies to help increase wear time. Everyone is working together so no one feels they have to overestimate wear time.

At each follow up visit, you will be asked to download the current wear report and email it to the treating clinician or their assistant. The data will be reviewed to assist with patient care. Without disclosing any identifiable information, we may utilize the data to further demonstrate the positive impact of bracing.

This agreement is in effect until it is terminated by either party.
